

# TRADITIONAL

# HYBRID

This project has been based around the Graphic Design class called Materials and Processes. Megan Allen, the instructor of the Materials and Processes class at Flint Hills Technical College wanted assistance in setting up a class on their learning management system of Moodle. This project started to take this class from a traditional face-to-face class, to a hybrid class. With the pandemic of COVID-19 this quickly changed into a fully online class for this year.

## GAT220 TAKEN ONLINE IS FOR...

- Students to have easier access to resources
- Students to be able to submit assignments with ease
- To reach Millennials and Generation z who are in the classroom as technology users and hands-on learners
- Meeting the goals of the college of integrating Moodle into all classes
- Letting the instructor be able to push out resources to students easier
- Letting the instructor be able to grade assignments easier and communicate feedback quicker

### Course Designed Using:

#### Moodle

Used as the Learning Management System

#### Microsoft PowerPoint

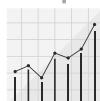

Used to take student notes and teacher's lectures

#### Adobe Connect

Used for weekly check-in with student & pilot testing

#### Google Forms

Used to conduct survey of all students

### Analysis

Meets the colleges plan with integrating Moodle into courses & meets students needs

### Design & Development

Face-to-face class to a hybrid. Then fully online due to COVID-19

### Implementation

Implemented a fully online course and conducted pilot testing

### Evaluation

Conducted a Likert scale and open-ended question survey to all students, pilot test with students done as well
